## Local News

Miss Rose McCracken, Bob McCracken and family, left Saturday.

Bryan Wilson of the C.P.S. High River, spent the weekend with his parents, Mr. and Mrs. J. C. Wilson.

A letter was received from Van Nys, California, by Beverly Billa recently, saying his mother and father were much better and gaining in strength.

Sgt. William Russell, Provost Corps of Grande Prairie, was home for a few days. Bill likes the north country and from appearances, it agrees with him.

Margaret Wickerson's name appeared in the Calgary Herald as a graduate from St. Mary's school in Calgary.

Jim Halton is in Edmonton attending the annual conference of Municipal Secretaries being held in that city during this week.

W. K. Gish, principal at our local school, left last week-end for Pullman, Wash., to continue his studies at the State University. W. K. is taking a Doctor of Education course of studies.

Amongst the birthday honors for the field: Gordon Fox, who celebrates his birthday on the 27th. Next we have one friend, Hugo Ballman, who celebrates on July 1st, and W. Walroth on the 3rd.

The local Air Cadets proved themselves as expert ticket sellers when they set out to sell tickets on a raffle for a quilt, donated by Mrs. Calhoun. The proceeds will go to the coffers of the Cadets. The winning number will be drawn on Saturday evening.

Rev. J. V. Hovey conducted a boys' hike on Saturday afternoon last, when he and fourteen boys turned out and made tracks for Hall's Coulee where a fire was started and winners and marshmallows were disposed of, followed by games. They returned declaring having had a good time.

Mrs. M. Patmore, Mrs. H. Hoover and children; also Mrs. J. Belshev, were visitors in Calgary on Saturday taking in the miniature Midway Fair and also St. George's Island. Miss Elaine Belshev and Miss June Patmore accompanied them home for the week-end.

Mr. and Mrs. M. Patmore journeyed to Calgary early Monday morning taking June and Elaine back to their offices.

Postmaster Mosey's mail cart never carried a more precious load when Vera and Lorne were given a joy ride round town on Thursday evening after the wedding ceremony, and later Vera couldn't make out how that suit left the room and its contents interfered with; especially when she kept an ever watchful eye over it.

## Local News

Mr. and Mrs. Wayne Heywood were Calgary visitors the first to the week.

Mr. and Mrs. Jim Schoenfeld were Calgary visitors this week.

Mr. Harry Whitfield of Calgary, was a visitor to our town last week.

Mr. Billy Uppshart was a Calgary visitor this week.

Mrs. J. G. Harrison is spending a few days at Banff.

Miss Edna Mosey commenced work in the Imperial Bank at Sylvan Lake on Monday.

Jack McCracken had the misfortune to hurt his back the first of the week and has been confined to bed.

Don't forget your donation to the Smoke Club. It takes a lot of giving to keep "Our Gaur" smog-free.

Fred Elhard has completed the kitchen on the north end of his house and is now building a chicken house.

Mr. Dick Nichol has severed his connection with the government road job. He got Hughie R. B's. recipe.

Mayor William Woods was a business visitor to the city on Tuesday of this week.

John Hehr sold a large herd of fat cattle to Harvey Adams of Adams, Wood & Weller, this week.

Pte. "Rusty" James, who has been home on furlough, leaves Friday to rejoin his unit in the east.

Mr. and Mrs. E. Mills, Happy McMillan and Helen Mills were Sunday visitors at the Geo. Jones ranch.

Mr. and Mrs. A. Stafford of Madden, were visitors at the home of Mr. and Mrs. Verne Thompson last week.

Darcy McDaniels and Harvey Adams were in our district buying cattle this week.

Sgt. Bill Russell (Provost Corps), Grande Prairie, was a Crossfield visitor this week.

Private and Mrs. Coulson left Saturday for the Coast. Private Coulson is taking a training course there.

Mrs. Assanese was a visitor to the city on Friday last and while there visited with her sister in the General Hospital.

Mrs. Gibson and family have rented the house recently vacated by George Lam and family; while Joe Pike and family are to move into the rooms to be vacated by Mrs. Gibson.

Mrs. E. Devins, her two little girls and Mickey Hutton spent the week-end at Sylvan Lake. They report the water very cold for this time of year.

Mr. and Mrs. Fred Becker and family were Turner Valley visitors last week, taking in the Stampede at Black Diamond on Saturday.

The Entertainment Committee of the Board of Trade are all set for their dance on Dominion Day, July 1st. Everybody welcome for a good time.

We understand Bert Hoover and Elmer Rosenberg are going to open a pet shop in conjunction with the Barber Shop and Pool Room.

Miss Mabel Waterhouse and Irene Walker left Calgary on Friday night for Hintonville, Ont. Irene expects to be gone a month.

The weather man has no mercy on Harry Wygie or Bill Walker, as they have to go—rain or shine. He hasn't any mercy on the rest, either.

If you see a nicely dressed man going around nodding his head, and saying "Yes" to everybody, don't get excited. That is "Mac" on his holiday.

Frank Browne, fisherman and hunter from the west, was in town last week getting his fishing license. Unless this rain lets up soon, we are afraid the fish will all drown.

Louie Becker, who was helping his brother Johnny, at Turner Valley, has returned to Crossfield. He wants to go back, as they don't have any rain down there.

Nurse Winnie Tredaway is home on three weeks' holiday. Winnie has been in training at the General Hospital and finishes her course this coming September.

With all this moisture now it would be a good time to use the town's sifter and rip up the south entrance road into our town from the highway. It is full of holes and rough as hell.

If you have anything to sell, advertise the fact in the Chronicle and look for results. In our last issue Mrs. Assanese told the readers she had some barbed wire for sale. A few hours afterwards she had the wire sold and got the money for it.

Hank McDonald, Haggart and Miller drove to Nanton last Tuesday afternoon. They report the crops south of Calgary are high as inches, but need rain badly. The pastures are turning brown in a good many places and the dust was really moving in the town of Nanton.

## Grand Dance in the U.F.A. Hall, Thurs., July 1st

### MATRIMONIAL

NUNN - SHARP

The home of Mr. and Mrs. James Sharp was the scene of a pretty wedding on Tuesday evening of this week when their daughter, Mabel Margaret, became the bride of Robert Nunn of Carstairs. Lalacs and other flowers decorated the room and formed the carnations. Mr. A. Sharp, brother of Rev. H. V. Hovey officiated.

Given marriage by her father, the bride wore a dress of pink sheer and carried a bouquet of roses. She was supported by Miss Viola Kinsey as bridesmaid, who wore a dress of blue sheer and carried a bouquet of pink carnations.

A reception followed the ceremony at which twenty-five guests joined the happy couple. After their honeymoon which is being spent in Banff, Mr. and Mrs. Nunn will take up residence in the Carstairs district.

The Board of Trade sponsored the Carstairs Club and it is to be congratulated on the very efficient way in which the whole day's proceedings were carried out. One committee was to unloading and weighing calves at the scales, one to unloading at the Munroe farm and seeing them allocated to their proper places. Mr. Tiddall officially closed the sale.

Special praise is due R. C. Sheehan, chairman of the Agricultural Committee of the Board of Trade and local club leader for the organization. Mr. Downey deserves special mention for keeping records straight, but every member of a committee deserves much credit and the thanks of all the club members.

Judging got under way at 11:00 a.m. with Mr. D. McKenzie of the Dominion Livestock Branch, and Mr. Wm. Maude of the Alberta Provincial Livestock Branch, serving as judges. After the first three classes were placed, time was taken off for lunch, and many picnic groups lunched on the lawns and under the trees. A good service was also provided by a booth on the grounds.

Following lunch, judging was completed, highlighted by placing the winners of the various classes into a new class and choosing the grand champion. Hereafter were judged together for ten special Hereford prizes, 125c down to 85.00. Auctioneer Archie Jones of Olds then went into action and disposed of the entire lot of calves shown in a very satisfactory manner. The top calf brought a bid price of 145 per pound while the rest averaged about 125.

Spurred on by such interesting and worth while competitions, boys and girls of the various clubs are making themselves very useful citizens in providing the quantity and quality of beef on the farm, and are thereby making themselves very useful citizens in a wartime world. Many of their elders might well follow their example, and through better breeding and selection improve the livestock picture on many Alberta farms.

The list of prize winners and buyers will be published next week.

For a peek at a real good garden, go and take a look at Mrs. C. O. Stafford's.

We saw Hughie R. R. and Dick Smith just shopping.

### Beef Calf Club Fairs

And Sales at Carstairs

A real inspiration to farmers and ranchers was the fair and auction sale of the calves of the Madden, Oranger, Carstairs, West Osburny and Cremona Junior Beef Calf Clubs. Held on Saturday, June 19th, on the expansive lawns in front of the home of Mr. J. W. Munroe of Carstairs, the combination affair was favored with very fine weather and drew a large attendance from many Alberta points.

As well as the keen competitions provided by the boys and girls of the various clubs, the spectators were favored with choice musical selections and comments over a broadcasting system.

The Carstairs Board of Trade arranged the program under the supervision of Mr. Hugh McPhail, District Agriculturist of Olds.

The Board of Trade sponsored the Carstairs Club and it is to be congratulated on the very efficient way in which the whole day's proceedings were carried out. One committee was to unloading and weighing calves at the scales, one to unloading at the Munroe farm and seeing them allocated to their proper places. Mr. Tiddall officially closed the sale.

Special praise is due R. C. Sheehan, chairman of the Agricultural Committee of the Board of Trade and local club leader for the organization. ### \* CHURCH SERVICES \*

\* CROSSFIELD UNITED CHURCH \*

Minister: Rev. J. V. Hovey, B.A.

United church services next Sunday will be held as follows:

Rodney: At 11:00 a.m.  
Tany Bryn: At 3:00 p.m.  
Crossfield Sunday school at 11 a.m.  
Public worship at 7:30 p.m.  
Everyone is invited to attend these services.

\* CHURCH OF THE ASCENSION \*

Crossfield, Alta.

Rector: Rev. A. D. Currie, L.Th., R.D.

Next service in the Church of the Ascension will be on Sunday, July 4th, at 7:30 p.m.

### NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of George Leask, late of Madden, in the Province of Alberta, Farmer, Deceased.

Notice is hereby given that all persons having claims upon the estate of the above named George Leask, who died on the 3rd day of April, 1943, are required to file with Margaret Leask, widow, and George Leask, Junior, the Executors named in the will of the said deceased, at the office of their solicitor herein, by the 31st day of August, A.D. 1943, a full statement duly verified of their claims, and of any securities held by them, and that after that date the Executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, which have been brought to their knowledge.

Dated this 23rd day of June, A.D. 1943.

L. R. LIPSITT,  
Solicitor for the Executors,  
310 Grain Exchange Bldg.,  
Calgary, Alberta.

20-22

The pupils of the Crossfield high school journeyed to Brownlee on Saturday last and enjoyed an afternoon boating and playing games. At six o'clock a lovely lunch had been prepared by themselves, was served. A fine time is reported by all. Many thank those who furnished the transportation.

\* CARD OF THANKS \*

Dog Pound Red Cross members take this opportunity to thank all those who helped to make their Community Sale a success. The sum realized from the sale and tea was \$275.00. It had been postponed twice due to rain, but Friday was a splendid day.

FOR SALE—500-600 lb. Massey-Harris cream separator No. 7, like new. HANK MACDONALD, Crossfield, Alberta.

19-14n

FOR SALE—Medium sized Cook Stove in good condition. (Elena Chlmas), MOON'S GROCERY, Crossfield, Alberta.

20-14n

Out of the FRYING PAN and into the FIRING LINE

GLYCERINE FOR ADOLPH BENITO & SONS

Save ALL WASTE fats & bones

Canada needs and must have every spoonful of fat drippings, every piece of scrap fat and every bone from every kitchen in Canada. This makes glycerine and glycerine makes high explosives. Bones produce fat. Also glue for war industry.

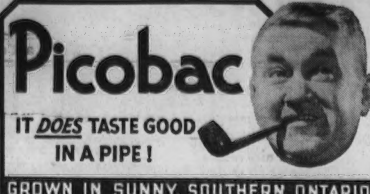

Don't throw away a single drop of used fat—bacon grease, meat drippings, frying fat—every kind you use. They are urgently needed to win this war.

Strain all drippings through an ordinary strainer into a clean wide-mouthed can. Save your grease fat (cooked or uncooked) and all types of bones—cooked, uncooked or dry.

When you have collected a pound or more of fat drippings, take it to your meat dealer who will pay you the established price for the dripping and the scrap fat. Or you can dispose of them through any Municipal or Salvage Committee collection station in EFFECT in your community.

Be a munition maker right in your own kitchen. For instance, there is enough explosive power hidden in ten pounds of fat to fire 49 anti-aircraft shells. So—every day, this easy way, keep working for Victory for the duration of the war.

## A World Food Conference

DELIBERATIONS OF THE DELEGATES to the recent United Nations Conference on Food and Agriculture, held at Hot Springs, Virginia, were of interest to all Canadians and particularly to those engaged in the production of foodstuffs. It is apparent that the members of the Canadian delegation took a leading part in the discussions, and importance was attached to the thirteen-hundred-word memorandum they presented to the conference. The Canadian delegation was led by Dr. G. H. S. Barton, Deputy Minister of Agriculture in the Dominion Government, and it included five delegates, nine advisors, and a secretary. Among many other matters dealt with in their report was the assurance that Canada is ready and willing to co-operate fully with the other nations of the world in the solving of post-war problems, and that Canada is favorable to a permanent international organization to carry on the work begun at these meetings.

### Living Levels To Be Raised

Among the many subjects discussed at the conference, that of an adequate supply of food for the people of every country in the post-war period. It was noted that freedom from want and freedom from fear are closely related and that in improving the production and distribution of food on a world-wide basis, much could be done to solve these two social problems. Surgeon-General Thomas Parran, of the United States Public Health Service, told the gathering that the life-span of every human being could be increased by ten years if present knowledge of nutrition could be applied universally. It has been pointed out many times in recent years that a large part of the population here, and throughout the world, suffers from malnutrition, and it is hoped through this conference, a remedy may be found for this deplorable condition.

### Canada Will Produce More

expansion will take place in Canada's export trade and that there will be provision for the distribution of surplus products grown here, including wheat, bacon, and cheese. In commenting on Canada's place in the plans made at the conference, Dr. Barton said: "The whole picture as it has been developed at this conference should appeal to Canada, because it is one of expanding agricultural economy." The results of the discussions of the gathering are encouraging to us, both because they promise much for the future of our agricultural industry, and because they promise to raise the standard of living here and abroad. A permanent organization of this food conference is to be set up in Washington shortly, and without doubt much more will be heard of its work.

### HEALTH LEAGUE OF CANADA

#### OUR MEAT RATION

When buying meat, it is now necessary to consider not only the coupon value, but what is more important, the relative food value and costs of the different cuts of meat.

The meats which will be more economical so far as cost and nutritive values are concerned will be found chiefly in Groups B and C, of which we are allowed from 1½ to 2 lbs. per person per week. While practically all meat has similar food value, naturally that with little bone, or no bone, will have, weight for weight, higher nutritive value; and the fresh cuts of meat are preferable to smoked and cooked varieties.

If your family is large enough, it may be possible to provide sufficient of the fresh cuts and have a coupon left for bacon. If it is a case of either smoked or cooked meats—or fresh roast or steak, choose the latter.

Group D includes many of the cheaper cuts, as well as the more expensive meats, and, due to the fact that more bone is present, the allowance is higher: 2½ lbs. per person per week; so, although they may be slightly more expensive as far as food value is concerned (since you pay for the bone as well), the actual food value of the meat itself will probably be about the same as in the other groups.

The allowance is quite sufficient for our needs, and it rests with the individual whether she wishes to have all the meat in the form of a roast or spread it over a longer period by using the smaller cuts, such as steaks and chops. If a roast is chosen, it should be made to last as long as possible; use it cold the second day; then make stew or shepherd's pie. Remember, liver, heart, kidney—all so valuable—are not rationed; also poultry, fish, tongue, spareribs, ox tail, and some cooked and smoked meats and sausages. So, with the amount of rationed meat allowed, and using fish once per week; poultry possibly once or twice a month; liver or other organ meat once per week; and the other unrationed meats and eggs occasionally, our families need notice little difference in their meat allowance, except for possibly smaller servings of the rationed meats, to make them go as far as possible.

A post card request to the Western Division Health League of Canada, 1111 Avenue Road, Toronto, will bring you a free copy of its authoritative Vitamin Chart.

### NEW KIND OF CANTINEEN

An experimental mobile service in England has been inaugurated in Finchley, a suburb of London, under which hot meals are taken each day to the aged and invalids. The cantineen was provided by the Church Army, the driver by the Women's Voluntary Service and the cooking by a civic restaurant.

### JUST A NEW SEA

Even our most imaginative apocalyptic today of the future of aviation will have to be revised tomorrow. Major de Severyn says we must think of the air as a new and unexplored sea, an eighth ocean. We are still scarcely in the Columbian era of exploration and conquest of that sea.

### Most Important Thing

#### Automatic Radio Transmitter Part Of Equipment For Merchant Navy

A large yellow "autocase" tags along with men of the merchant navy when they set out to sea. And to shipwrecked men its contents are more important than either clothing or food. It's an emergency automatic lifeboat radio transmitter and already has saved many seamen's lives during this war.

If no radio man is among the survivors, the transmitter can be set in operation by merely pressing a button. This starts an automatic SOS call which continues steadily for two and a half minutes. If attack is from the air, an aircraft distress call—a comparatively new distress signal—can be sent.

When the enemy strikes the ship's officers must see the transmitter, if taken from its locker and put in a lifeboat. It's waterproof, will float and is easily discernible by its bright yellow casing. If necessary it can be used as a raft.

With each transmitter a separate small receiving set is provided and if it can be saved two-way communication is possible.

The radio is equipped with an eight-volt dry cell battery which will not spill and will provide current for 100 two-and-a-half minute messages. These may be sent at whatever intervals are desired.

### SMILE AWHILE

One of John's best friends had died, so he called on the widow to express his sympathy.

"Jim and I were friends," he said. "Isn't there something I could have as a memento of him?"

She raised her velvety brown eyes, which a few seconds before had been wet with tears.

"How would I do?" she murmured.

"My dear, a great doctor says women require more sleep than men."

"Indeed?"

"Yes, dear; so—perhaps you'd better not wait up for me tonight."

Father (sternly, after looking over young son's report card): Don't tell me you let a mere girl get ahead of you?

Son (meekly): Yes, Pop, but girls aren't as much as they used to be in your day.

A professor at the University of Chicago was riding in a taxi in Washington with a woman operator, when they were caught in a traffic jam. After some moments of waiting, the taxi driver got out to see what was the matter. She came back, got in, nodded her head in deprecation.

"Woman driver," she said.

Two sweet young things were discussing affairs of the heart.

"So you've accepted Tom?" said one acidly. "I suppose he didn't happen to mention that he had previously proposed to me?"

"Well, not exactly," replied the other blandly; "but he did confess that he'd done a lot of silly things before he met me."

She: What were you doing after the accident?

He: "Just scraping up an acquaintance."

Shopper—Will you please tell me where I can see the candleabra?

Floorwalker—All canned goods are in the basement, madam, elevator to the left.

"My husband plays tennis, swims and goes in for physical exercises. Does your husband take any regular exercise?"

"Well, last week he was out seven nights running."

Doctor: "You should take a bath before you retire."

Patient: "But, doctor, I don't expect to retire for another twenty years."

"Before we married," she sighed "you used to call me by long distance just to hear my voice."

"Well," retorted her husband, "now you won't let me go far enough away to use long distance!"

Mistress (hearing crash in kitchen): "More dishes, Mary?"

Mary: "No, ma'am, yes?"

In the ninth grade English class the teacher was discussing etiquette. When she finished, she asked Bobby how he would ask a girl to dance.

Bobby replied: "Come on, worm, let's wiggle!"

"Something seems to have made you smart this week, Tommy?"

"Yes'm! Pe's slipper it was."

### Means Hard Work

#### Producing, Handling And Dehydrating Eggs For Shipment To Britain

Canadian farmers are producing 63 million eggs for the people in Britain to eat this year. In Britain only one fresh egg is allowed each person a month. Eggs from Canada will help enormously in filling out the British ration.

A lot of hard work will go into their handling and dehydrating. Drying the eggs for shipment has turned out to be the answer to problems of transportation and refrigeration. Not only can dried eggs go into one-fifth of the shipping space formerly used but, with no refrigeration problem, the eggs are most acceptable when they reach Britain.

National Research Council in Ottawa has experimented and investigated the effects of the various processes of drying, packaging, storing and transporting the eggs. This has resulted in improved quality control methods.

The process of drying the egg is very interesting. The eggs are broken, eggs and whites removed from the shells and thoroughly mixed together. The yellow mixture is then pumped through a tiny nozzle at high pressure into a large drying chamber which is either box or cone shaped. Inside this chamber the fine fog of egg meets a hot dry current of air which dries the egg mist into a powder. This powder settles to the bottom of the chamber from where it is carried away to be packed for shipment.

These palatable high quality dried eggs are very popular with British housewives. They can be used in baking and for making many nutritious dishes such as omelets, scrambled eggs and custards—in fact they can do all that is claimed for them, just by following directions on the package.

It is expected that there will be enough egg powder on the British market to allow each family to purchase a six-ounce package a month, the equivalent of a dozen fresh eggs. Supplies of egg powder which are shipped in 14 pound packages for institutional users will reach British troops and workers in children's dishes served in canteens and British commercial restaurants.

### WINGS PARADE

LAC H. J. Hirschfeld, Hirschfeld, Sask.  
LAC I. R. Merkell, Langrunk, Sask.  
LAC J. E. Rivers, Indian Head, Sask.  
LAC B. M. Stone, Hirschfeld, Sask.  
LAC T. W. Wirtz, Sask.

#### JUST FOR PRACTICE

A Rome radio broadcast recorded by Reuters agency gave extracts from an article in the newspaper Il Tevere urging Italian gunners "to get more practice" by shooting Allied airmen forced to parachute to the ground. "A parachute comes down slowly," the article said. "It makes an excellent target for machine-guns and artillery."

Christmas is celebrated with picnics and trips in the open in Australia.

## BOMBS TONIGHT?

TOY HOUSES, darts for bomb A.R.P. workers study models like these, to be ready if real bombs come. They're out training all hours . . . come in hungry. "Man, that flavour of Kellogg's Corn Flakes hits the spot when I get home," says Cecil Biddy (centre). Hits the spot with 4 out of 5 housewives in Canada, too. And they're ready in 30 seconds, leave no pots and pans to wash. Get some tomorrow. Two convenient sizes. Made by Kellogg's in London, Canada.

SAVE TIME - SAVE FUEL - SAVE WORK!

### Plays Important Part

#### Army And Navy Strategy Depends Greatly On Radar

The Radar, an electronic device credited with having helped save the British Isles from invasion after the fall of France, is playing an increasingly important part in Army and Navy strategy, according to Dr. W. R. G. Baker, a General Electric Co. vice-president.

Baker said the radar located planes and ships far beyond man's former "vision" even in fog, darkness and other adverse conditions.

The company's past experience in developing apparatus which forms the basis for the present-day radar enabled construction to start long before Pearl Harbor, he declared.

Many historic remains of Roman and Pre-Roman times can still be found in Tunisia.

### Must Be Repaired

#### French Ships Which Joined Allies Also Need Efficient Men

Several months are expected to elapse before the French ships which have joined the Allies go into action, because after three years of idleness and partial dismantlement they must be cleaned, repaired and refitted and the crews restored to full strength and efficiency. The repairs might be done at Alexandria, in Great Britain or the United States, but trained officers and men are scarce, it was pointed out.

The psychological effect of the acquisition of these new units was not questioned in London, but the actual value of the Allies' naval strength was not regarded as high.

The Great Salt Lake in Utah is six to eight times saltier than the ocean.

## PRESERVED FREEDOM

Reason Democratic Nations Can Keep Order In Midst of Anarchy

T. B. Macaulay in his History of England, written in 1844, comments on a fact, which has endured until the present day, when its truth is again self-evident. Writing in the middle of the last century, the historian said: "All around us the world is convulsed by the agonies of great nations. Governments which lately seemed likely to stand during ages have been on a sudden shaken and overthrown. . . . Europe has been threatened with subjugation by barbarians, compared with whom the barbarians who marched under Attila, and Alboin were enlightened and humane. The trust of friends of the people have with deep sorrow owned that interests more precious than any political privileges were in jeopardy, and that it might be necessary to sacrifice even liberty in order to save civilization. Meanwhile in our world the regular course of government has never been for a day interrupted. The few bad men who long for license and plunder have not had the courage to confront for one moment the strength of a loyal nation, rallied in firm array. And, if it be asked what has made us to differ from others, the answer is that we never lost what others are wildly and blindly seeking to regain. It is because we had freedom in the midst of servitude that we have order in the midst of anarchy."

## Keeping Their Loyalty

Expression To Their Thoughts  
Two stories that have just come out of Norway reveal how loyal Norwegians still find ways and means of giving expression to their sentiments. A school teacher was arrested after his class had been reading "Sigurd Jorsalfar," by Bjornson. One passage had been declaimed by the youngsters with vim, vigor and enthusiasm. It was "Long Live the King!" The police asked the teacher whether the youngsters were thinking of King Sigurd Jorsalfar, who reigned in the 12th century, or of King Haakon VII, who is in England. The teacher couldn't see any reason for reawakened enthusiasm for King Sigurd but maintained the passage had to be read with feeling to be effective. The case ended with the authorities prohibiting the reading of "Sigurd Jorsalfar" in schools. At a Norwegian factory about 250 men were herded into a large room in the midst of working hours to listen to an NS orator whose purpose it was to "convert" them to Nazi thinking. The orator was going along with his blast when suddenly a large placard bearing the inscription "Long Live the King" rose through an opening in the floor behind him.

## Latest Piece Of Magic

Radio "Sewing Machine" Can Stitch Thermo-Plastic Without Thread  
Radio-electronics do many things these days that were impossible a few weeks or months ago. For instance, a radio "sewing machine" that stitches thermo-plastics together without thread is the latest piece of magic from the RCA Laboratories, Princeton, N.J.

The idea is expected to find a wide application in the "seaming" of raincoats, caps and weather balloons, which have been manufactured for the armed forces from synthetic materials. The nearest thing to thread in this sewing machine is a radio-frequency current applied by two small rollers which between which pass the two pieces of thin plastic to be joined. The unit is effected by heat induced inside the materials by the radio-frequency currents. Technically, the union is made possible by the "dielectric" losses in the materials, created by the struggle of the current to get through the material.

## Women Receive C.B.E.

(Commander Of The Order Of The British Empire)

MRS. WALLACE CAMPBELL  
Windsor, Ont.

## This Is Good Chance

Girls Who Like Exciting Work Can Join Service Patrol

Any tom-boys who have always wanted to do exciting, dangerous things and develop a flock of unfeminine muscles by taking part in all sorts of unseasonably pastimes now can get at least part of their desires fulfilled in the new trade that the women's division of the air force has opened. The new trade is the service patrol.

Service patrol airwomen will correspond to the military policeman in the air force. They will be doing escort duty on the trains and patrol duty in the large cities. Not only will they have to keep themselves out of mischief but they'll have to see that any other airwomen who come under their eagle eye stay out of trouble.

Trainees in the service patrol receive a four months course of instruction in Ontario. Some of the subjects they'll be drilled in are: discipline, marksmanship and life saving. Girls in this trade will see a great deal of Canada and have a trade that's a bit out of the ordinary on which to build a career after the war is over. Playground work or any job supervising women would be ideal for a woman with this training.

## Came In Safety

British Sunderland Flying Boat Made Landing On Solid Earth

A 30-ton British Sunderland flying boat climaxed an attempt to rescue survivors of a bomber crash by successfully landing on solid earth with a seven-foot hole in its side. The British information service said, calling it the first landing of its kind. Unable to alight in water because of the hole, the crew prepared for the worst by belly-chopping by tossing overboard everything inflammable and cushioning themselves against the shock. Coming in at 60 miles an hour, the boat touched with a slight jar and came safely to rest on her left wing 160 yards farther on.

## A Valuable Collection

Very Old Bibles Owned By Rector Of Saskatchewan College

One of the most ancient collections of Bibles in Canada, valued at thousands of dollars, was used a short time ago at Notre Dame College, Wilcox, Sask. When 27 students were sworn into the University Air Training Corps. . . . The Bibles, some of them dating back to the 15th century, were from the private collection of Rev. Athol Murray, rector of the college, and well-known Canadian educationist and sportsman.

## ONE WAY TO LEARN

There is scarcely a theatre in which Canadian flyers are not playing a part so that no great surprise is occasioned by the fact that Canadian planes and men are opening against Kluka in the Aleutian Islands. Many young Canadians, not strong on geography before the war, will know the subject at first hand before they get back.

## WROTE BOOK FOR CHILDREN

Arthur Mee, 67, originator and editor of the Children's Encyclopedia, is dead. In his North American edition titled "The Book of Knowledge" it was known to millions of children during the last 35 years. He originated the best seller in 1908 after his wife suggested he write a book which their six-year-old daughter could understand.

## A GOOD MOTTO

London.—The motto "On the War-path" has been chosen by members of the Red Indian squadron of the Canadian fighting wing overseas, and on a recent sweep the squadron took to the air with the likeness of an Indian emblazoned on the cowling of each aircraft.

## Buy War Savings Stamps Regularly

Chicago.—There is something about train rides that mysteriously causes a temporary loss of memory among passengers. More than \$100,000 in cash and jewelry was blithely forgotten by Pullman riders in 1942, according to the lost property division of the Pullman Co. Value of the forgotten jewelry ran into the thousands and \$40,000 in cash was restored to the owners.

## MRS. F. L. PLUMPTRE

Toronto, Ont.

## Inspects Canadian Division

A signals officer of the British Army, Lieut.-General Sir H. C. E. Wemyss, C.B., D.S.O., M.C., recently inspected signals units of a Canadian armored division overseas. Here, he talks to Brig. J. E. Genet, M.C., formerly of Ottawa.

## Meets All Expenses

Tennessee College Is Self-Supporting And Has No Financial Worries

Near Nashville, Tennessee, is a senior college that runs on its own steam. It meets all its budgetary needs, pays its faculty and supports its students out of the income of its 27 campus industries and the crops grown on a 900-acre farm. It gets no gifts, or endowments, practically no tuition and yet has no debts. Crops grown on the college farm are processed in 27 campus industries and sold to food distributors throughout the country.

The college was started nearly 40 years ago by Dr. E. A. Sutherland in an old frame house on 400 acres of wormout land in which he invested every cent he had. Adjoining acreage was bought in later years.

On one side of the campus is a broom factory manufacturing 40-don brooms a week with broom-corn grown on 25 college acres. A bakery manufactures bread from wheat and soybeans. An 80-cow dairy furnishes milk for all dormitory needs and to sell. A 70-acre truck patch and a similar acreage in orchard furnishes products for a big canning industry which supplements college food needs and supplies an ever-growing market. One of the great vineyards of the state is on a 30-acre patch of this farm.

## Belgian Sabotage

Removal Of Labels From Freight Trains Annoys Nazi Inspectors

The latest form of sabotage by Belgian patriots consists of removing labels from freight trains arriving from Germany, resulting in unbelievable confusion and delay. The Belgian news agency label reports. The action, it was said, forced German inspectors in various Belgian railway yards to spend days in ascertaining the contents of freight cars and verifying their destinations.

The agency also reported that safes containing uncut diamonds have been broken open by German authorities at Antwerp in the latest attempt to make the fullest use of this specialized industry in their war machine. Until recently the Germans had tried to work with the former diamond industrialists but they reached the conclusion that they were making headway too slowly and decided to take over the entire industry.

## After The War

Many Changes Will Come But Not All At Once

Are you looking forward to a world, right after the war, in which you'll drive a super-streamline automobile made mostly of plastics and with a motor weighing practically nothing? If so, forget it! Changes are not going to come that suddenly. There will be plenty of new wrinkles in your way of living after the war, just as there were in the post-war period of 1920-40, but they will be evolutionary rather than revolutionary. It's a healthy thing to give your imagination play, but don't let it run away.—Minneapolis Star Journal.

## "FOGOTTEN PROPERTY"

Chicago.—There is something about train rides that mysteriously causes a temporary loss of memory among passengers. More than \$100,000 in cash and jewelry was blithely forgotten by Pullman riders in 1942, according to the lost property division of the Pullman Co. Value of the forgotten jewelry ran into the thousands and \$40,000 in cash was restored to the owners.

## Clever Sharpshooters

Guns Take Care Of Hit-And-Run Nazi Raiders

On Britain's southern and eastern coasts, where hit-and-run Nazi raiders prey, a new type of anti-aircraft gunner has been born—the "sharp-shooter".

On a recent raid, when something like 24 Nazi planes came over a south coast town, four of them were knocked down by anti-aircraft fire. Canadians were credited with one of the four planes.

In the development of the sharp-shooter, his food and even his recreation have been specially selected to give him the split second mental and physical reactions necessary to deal with a target which moves at 300 miles an hour. Unless a man can range, sight and destroy his target within five seconds he is much too slow for the job.

The sharp-shooter's guns are still anti-aircraft guns but seldom do they point toward the sky. Usually they fire almost horizontally and from posts set up on cliffs or heights of land they sometimes even point downwards. The fighter-bomber comes in barely skimming the waves of the English channel and only by shooting down can these guns range on the enemy.

## Playing Vital Role

Spade Has Become Prime Weapon In Russia's Defence

The lowly spade has won recognition as a prime weapon in Russia's defence. This agricultural implement is playing a vital role in Russian campaigns on the home front. In 1941, the invader was halted at the gates of Moscow by fortifications dug out by Muscovite citizens. In 1942, gardens dug with these same spades helped tide the people of Moscow over their second hard winter.

This year, as one walks the streets of Moscow on a Sunday morning, one sees eight out of 10 passerby hastening, spades on their shoulders, to the city's suburbs to work in their gardens. Students smilingly display their collared hands; bookkeepers have become experts in soil treatment and freely pass on the knowledge they have painstakingly acquired.

## Payments Completed

Wheat Acreage Reduction Program For Prairie Cost \$19,250,000

Payments made to farmers in the prairie provinces under the wheat acreage reduction program for 1942 amounted to approximately \$19,250,000, of which Saskatchewan farmers received about \$10,500,000. It has been announced by E. L. Gray, Regina, director of the prairie farm assistance act.

Farmers in Alberta were paid close to \$5,500,000 under the plan while those in Manitoba received \$3,250,000. Practically all payments have now been completed.

Mr. Gray said the \$19,250,000 had been paid to farmers who reduced their wheat acreage and increased their coarse grain, flax, summerfallow, grass and rye acreage.

## WOODEN GOLF BALLS

A B.C. Bulletin says it's almost impossible to buy rubber golf balls in most parts of Rhodesia now, so a firm in Bulawayo has started making them out of wood. . . . and with very satisfactory results. The wooden golf balls have mesh markings just like the ordinary ones, and you can get a 180-yard drive out of them.

## Name Has Stuck

Canadian Soldiers Claim To Have Originated The Term "Jeep"

A controversy is raging in army circles in military district number 10. It revolves around the derivation of the term "jeep," applied to a certain type of army vehicle.

Members of Canada's permanent force claim the term originated in Canada, and not as is popularly supposed—in the United States. According to these soldiers, the expression was coined at Shilo camp, Manitoba, in 1938.

In that year, they say, when they were undergoing their annual summer training, there arrived one day a huge, crated box. It was dumped outside the Army Service Corps quartermasters' stores, and as no one bothered to open it, the boys became a little curious. Days and weeks went by, and the mystery of the strange box deepened. Finally, one soldier, an ardent admirer of "Popeye," remembered a story which ran a few years ago, about a similar mysterious package which had arrived at the home of the spinach-eating mariner.

Like the crate at Shilo, it remained unopened for several weeks. When it was finally opened, it revealed a strange little animal with the ability to answer questions. Its name—The Jeep.

In time, official permission—in triplicate—arrived from Ottawa to open the box. When it was finally pried open it was found to contain the latest type of army vehicle. The mystery was solved, and everybody was happy. But the name—Jeep—stuck.

That's the Canadian soldiers' version.

## The Cossack Scout

Could Be Compared To A Commando On Horseback

The Cossack scout is a kind of commando on horseback.

Usually he is a youth who learned to ride as soon as he could toddle, who could wield a sabre before he wielded a pencil. But the arts of the cavalryman are small part of his skill.

The Cossack scout of the Red Army must know how to fight on his stomach, sit in a trench, recognize a mine when he sees it, and fire a machine-gun. Sometimes he will crawl for miles with a Tommy-gun in his hand.

He must go without food for days on end. He must know the sounds of the forest, the hills, the swamps. He sometimes swims a river clad and armed. He must lie for a long time entirely submerged, breathing through a reed.

Sometimes his mission is the location of an enemy airfield, sometimes it is to bring back German prisoners for intelligence purposes. He is the Red Army's sixth sense.

## Tribute To Canada

London Paper Praises The Skillful Handling Of War Time Finances

The London Financial Times has paid tribute to what it calls Canada's skilful handling of her wartime finances.

The tribute was made in a long editorial commenting on Canada's latest contribution to the war cost.

Under the sub heading "Canadian partner" the editorial recalls various measures through which aid has been given Great Britain by the Dominion.

It says in part and we quote: "The Dominion, with a population of roughly a quarter of this country, and less than eight per cent of that of the United States, proposes to transfer beyond its borders war production equivalent to 40 per cent of the war expenditures of this country. 'Figures show clearly that Canada met the problem of war finance in an altogether admirable manner—we in Britain have good reason to express high appreciation of the Dominion's achievements and applaud the new strength of Canada today.'"

One person in every six living in Britain depends on the London metropolitan water board for his water.

## Prindoe Sunk With Wheat Cargo

The freighter Prindoe went to the bottom of Lake Superior with its cargo of 215,000 bushels of wheat after a collision with another freighter off Passage Island. The collision occurred in conditions of poor visibility. Owned by Paterson Steamships Ltd., she was bound for Goderich, Ont.

## BONUS WILL BE PAID FOR CLEAN WOOL

To Growers Who Comply With Regulations Drafted By The Agricultural Supplies Board

The agricultural supplies board has drafted regulations under which the new bonus on clean wool will be paid in provinces which have entered agreements with the Dominion for sharing of the bonus cost.

The regulations were published recently in Canadian war orders and regulations. They are:

1. The bonus will be paid on all standard grades of Canadian unwashed fleece wool, with the exception of reject and defective grades, where the wool has been prepared by the grower in accordance with the following regulations:

- (a) The wool must be dry and in good condition—not damp, wet or musty;
- (b) The wool must be free of seeds, chaff, straw, burrs, manure tags, and other foreign matter;
- (c) The hairy and black or grey leg and face clippings must be kept separate and must not be rolled with the fleece;
- (d) Each fleece must be folded and tied separately, preferably rolled from breech to neck with the flesh side out;
- (e) Fleece must be kept intact and tied with the standard paper fleece twine.

Where necessary, the neck portion of the fleece, lightly twisted, may be used for holding the fleece intact. The bonus will not be paid on wool tied with binder twine or other class twine.

The bonus will not be paid on any wool received at a registered warehouse in generally poor condition or requiring special care or work in preparing it for market.

2. The bonus will also be paid on clean, well-washed virgin wool which is free from vegetable matter, black and grey locks, brown and yellow ends and any objectionable foreign matter.

3. To qualify for the bonus, all the wool in a consignment, or portion of a consignment, must be in accordance with these regulations. (For the convenience of the grower in shipping, the wool eligible for bonus and the reject portion of the clip may be packed and included in the same sack or container provided a satisfactory division has been made in order to protect the clean portion of the clip.)

## GEMS OF THOUGHT

### FREEDOM THROUGH GOVERNMENT

All the distinctive features and superiority of our republican institutions are derived from the teachings of Scripture.—Everett.

The very idea of the power and right of the people to establish government presupposes the duty of every individual to obey the established government.—Washington.

Patriotism is a blind and irrational impulse unless it is founded on a knowledge of the blessings we are called to secure and the privileges we propose to defend.—Robert Hall.

We must accept the disciplines of democracy as well as its freedoms. Discipline from without flourishes when discipline from within grows weak.—Harry Woodburn Chase.

Only free people can hold their purpose and their honor steady to a common end, and prefer the interest of mankind to any narrow interest of their own.—Woodrow Wilson.

Discerning the rights of man, we cannot fail to foresee the doom of all oppression. Slavery is not the legitimate state of man. God made man free.—Mary Baker Eddy.

First printer in the western hemisphere was Giovanni Paoli of Mexico City, in 1539.

## Looks After Airmen

Air Vice-Marshal Colyer Calls Himself Housekeeper For R.A.F.

Whether they're in the training stations of Canada, on the African fighting front, or just waiting for action in some Indian outpost, men of the R.A.F. are assured of a constant and steady flow of supplies wherever and in whatever quantity they are needed.

The report of Air Vice-Marshal Douglas Colyer, director-general of personal services for the British air ministry, who has been engaged in an exhaustive tour of R.A.F. stations throughout the dominion.

In his official capacity he takes charge of all arrangements pertaining to the feeding, clothing and housing of British airmen all over the world. He has, in fact, been known to describe himself as a sort of chief housekeeper for the R.A.F.

"This is my first trip to Canada," he stated, "and I have been tremendously interested and impressed by the way you are looking after our men over here. They all seem happy and comfortable."

He thinks men of the R.A.F. have managed to assimilate themselves very quickly and have picked up several good habits from Canadians. The most notable, in his opinion is the tendency to drink lots of milk, a habit quite uncommon in the British Isles. Milk is strictly rationed at present, but the air vice-marshal predicts that after the war this habit will have a beneficial effect on British civilian health.

It is not merely at training centres that supply conditions are good. Air Vice-Marshal Colyer emphasized. Operational units based in Great Britain receive the same treatment as do airmen on the other fighting fronts.

## Did Not Volunteer

Mascot Of H.M.C.S. Nonsuch At Edmonton Has Captain's Commission

Edmonton Royal Canadian Naval establishment, H.M.C.S. Nonsuch, has a new captain who is making himself at home.

He's Sasville Kidd, 13-month-old English bulldog with a pedigree, who has been sworn into the navy as mascot with the rank of captain, the highest rank given in the Royal Canadian Naval Volunteer Reserve. He was sworn in on a copy of Robert Louis Stevenson's "Treasure Island."

Captain Kidd didn't exactly volunteer his services. He was given to Lieut. J. A. Dawson, commanding officer of H.M.C.S. Nonsuch, by Mrs. C. J. Kidd of Edmonton and became the first dog in the history of Edmonton's naval establishment to be sworn in with a commissioned rank.

The navy plans to train him to lead parades and act as mascot at sport functions. They hope he won't go the way of a predecessor, another bulldog named "Danny" who apparently didn't take kindly to navy life and skipped off on extended shore leave.

But "Danny" didn't have a captain's commission.

## WILL BE ALL-BRITISH

Pedigreed Italian queen bees have ruled British hives for years but now are disappearing because of the impossibility of replacing them. However, "mongrel" British queens will take over and as one apiarist said: "British honey will be 100 per cent. British."

## NEW TYPE LIFEBOAT

For the first time since its invention a new type of lifeboat equipped with engine, sails, wireless set, food and medical supplies, has been dropped by parachute from a plane of the Air-Sea Rescue Service, saving all seven members of the crew of a Halifax bomber forced down in the North Sea while returning from a raid on Dortmund.

## Canteens Provide Recreation For Canadian Soldiers

Canteens conducted by the various services of the army are "homes from home" for Canadian lads in uniform. Here they gather in the evening to join in song, play games, and do their correspondence.

## According To Circular Tribute To Navigators Want Reserve Supply

Nazis Are Pictured As Being Very Soft-Hearted

An official German circular giving the instructions for dealing with foreign workers and prisoners of war warns against the "too soft German heart." Anala, the Dutch news agency reported recently.

The text of the circular was published in a Netherlands underground newspaper received by Aneta.

The circular told the so-called heroworkers that they must teach the foreign workers about "our German qualities such as honesty, cleanliness, sacrifice and sense of duty and responsibility," and "severely punish infringements."

"The attitude towards prisoners of war is clear for everybody. They are still enemies. Keep your distance. No friendly words, only commands. He who gives them extra food, cigars, money, etc., is a traitor, for this makes it easier for them to escape," the circular said.

"Be very standoffish to foreign workers. Sensitiveness is wrong. Though it is difficult for the German people, they must learn that the too soft German heart must be second to common sense. Only iron hearts can bring victory."

"We shall try to make the foreigners accustomed to German habits. They do not know about social insurance, people's service, strength through joy, etc."

## Has Wide Range

Lamp For Aircraft Life Rafts Is Tiny But Powerful

Details of a tiny spotlight scarcely larger than a walnut but powerful enough to have a theoretical range of 70 miles have been disclosed by the Westinghouse Electric and Manufacturing Company's lamp division.

Ralph R. Brady, manager of commercial engineering at the lamp plant in Bloomfield, N.J., said the lamps are packed in the rubber life rafts "with which all ocean-flying military aircraft are now equipped." Rafts are also being radio-equipped and Brady said there is no doubt that the new lamps will be used in the light.

The six-watt lamps operate from a small hand-cranked generator included in the radio equipment, he said. With a 1,500-candlepower beam, the lights could burn 10 nights and be visible many miles.

The angel fish is equipped with long appendages which warn it when too near the sea floor and in danger of damaging its delicate lower fins.

Flight Lieutenant Thinks More Should Be Said About Them

In fighter command, gunner ranks right up with actual flying ability, but in coastal command, where the hours are long and the work is done in darkness so far as the Canadian Demon squadron is concerned, navigation is the thing.

"I'd hate to think where we'd be without extra-hot navigation," said Flt. Lt. Cameron Taylor of Winnipeg, a peace-time engineer turned pilot.

"The navigators take us out and bring us in and guide us through weather 'fronts' and storms. Without them we'd be lost. You hear plenty about pilots but not nearly enough about the navigators."

FO. George Peck of Zelma, Sask., and PO. Ed. Waugh of Hamilton, Ont., are both navigators with the Demon; like Taylor they served previously on anti-shiping operations until the squadron was converted to fly Wellingtons instead of Hudsons and to patrol selected areas of sea where submarines may surface on their way to the shipping lanes.

Peck navigates for the squadron's wing commander, an Englishman in the R.A.F. He explained that navigation in coastal command had to be even better than in bombing operations because in coastal command the navigator must rely more than ever on his technical skill.

"There are no landmarks, for one thing," said Peck. "Any time you get the urge to look out and take a bearing all you've got around you is miles and miles of sea. So you just don't look."

The bomber men who fly against Germany's target towns may have been over the route before, or if they haven't somebody else has, and they know certain landmarks, such as bends in a river, by which to check their course. There's nothing like that at sea.

## KEEPS CONTROL OF SEAS

Axla submarines have failed to dominate the sea despite a heavy loss inflicted upon United Nations shipping, Capt. Luis Carrero Blanco, sub-secretary to the presidency of the Spanish government and for years right-hand man to Gen. Francisco Franco, declared. The British fleet has completely blocked Axis ocean traffic, he said.

## PRODUCT OF CIVILIZATION

Returning after a long term of service in Africa, a missionary priest told a Boston audience the other night, "My dear people, I have seen all the weird dances of the so-called savages in Africa, but I had to come to civilized America to see a jitterbug."

Far Possible Emergency Needs Of Feed Grain In Eastern Canada

Plans for building up a reserve supply of feed grain in eastern Canada to meet possible emergency needs of the winter were announced by Agricultural Minister Gardiner.

The plan will be put into force by the feeds administration and the agricultural supplies board.

Curtailment of lake shipments and other factors which have interfered with the ability of the grain trade to build up reserve supplies have necessitated government assistance, Mr. Gardiner said.

Grain which comes under the plan will be used only to meet emergency conditions similar to those which prevailed last winter, should they develop.

"The heavy rail traffic on Canadian railways was severely curtailed throughout a greater part of the winter of 1942-43 because of unusually severe weather conditions," said Mr. Gardiner's statement. "This slowed up the movement of feed grains from western Canada, resulting in only a portion of the needed supplies getting through."

"It is anticipated that feeding requirements in eastern Canada for western grain will undoubtedly be on an even heavier scale in 1944."

## Heroic Gunners

British Field Battery Carried Out Orders To Last Man

A single "V" tapped out in Morse, was the final challenge hurled by gunners of the British 155th field battery, whose heroism in holding off strong German armored forces for a day at a critical stage of the Tunisian battle has just been revealed by the war office.

All but nine of the battery's 130 officers and men were lost at Sidi Nair, but the gunners had covered the Humphreys as they had been ordered and had prevented a dangerous German breakthrough.

From dawn to dusk Feb. 26 the gunners, under air and ground attack, fought off enemy armor and infantry, destroying tank after tank at ranges which were 10 yards in the last stages of the battle.

They lost gun after gun until finally one 25-pounder and a few machine-guns were left. A batman and cooks, with one officer, manned these to the end. Then headquarters heard this final wireless message: "Tankers are on us."

It was followed by a single "V."

Raccoons dunk every particle of their food in water before eating it.

## POWERFUL NEW DRUG

Penicillin Delivered To Be One Of The Great Medical Discoveries

A new drug, penicillin, more powerful and effective in the fight against deadly germs than the sulfa drugs, is described in the following article by Sydney B. Seif in the Wall Street Journal:

A mossy pale green mold is growing faster and faster in row after row of glass bottles in the laboratories of leading drug producers.

It is very much like the mold that makes camembert cheese taste like camembert, but instead of making cheese it is making penicillin, the powerful new germ-killing drug.

Penicillin gives constantly increasing evidence of being one of the great medical discoveries.

In the near future it is expected the mold will be moved from its laboratory bottles into full scale chemical equipment and commercial production will get under way.

Penicillin is hundreds of times more potent than the sulfa drugs. It will do nearly everything that they will and do it better without the toxic after-effects sometimes experienced with sulfas. Like the sulfa drugs, penicillin can be injected directly into the blood stream or between the muscles. It generally acts very much faster and cures certain infections which the sulfas apparently cannot touch.

Already penicillin is known to be effective against the bone infection, osteomyelitis, against pneumonia, diphtheria, gas gangrene, and some of the most virulent types of blood poisoning.

Penicillin is the most effective agent known against staphylococcus infections. The staphylococcus is one of the virulent germ types which causes boils and abscesses and much more serious diseases, including osteomyelitis. It apparently works with extraordinary effectiveness against the most dreaded streptococcus which causes what used to be called blood poisoning.

All the evidence so far indicates that penicillin has the major medical advantage of being an actual germ killer. The sulfa drugs on the other hand are what is called bacteriostatic, which means that they stop the breeding of germs, but without actually killing them. Penicillin also is not affected by pus, which interferes with the action of the sulfa drugs, it does not harm the valuable and useful natural bacteria in the intestines, called bacillus coli.

Penicillin is so powerful as a germ killer that one part in 85 million is effective, in other words one drop would kill several bathtub full of germs. Though harmless to the human system it is more deadly in combating germs than bichloride of mercury or carbolic acid.

## A Lucky Private

Did Not Have To Worry Over "Thank You" Notes

Pte. Dick Nicola, of Chicago, Ill., in common with most soldiers, likes to receive letters, and plenty of them, but when it comes to writing them, he confesses lamely that he "just doesn't have time." When he opened a recent bulky letter from home, out fell more letters, each in envelopes already addressed to various of his friends. Perturbed over her son's laziness in writing some long overdue "thank you" notes, his mother had written and typed them herself, leaving only the space for signature.

"They also serve who sit and write," mused the soldier.

To help warriors fill out incident report forms quickly Robert Burns, a Sale, Cheshire, word has invented a "blitz shorthand."

A train passenger is now three times as safe as one who used that mode of transportation in 1883.

WORLD HAPPENINGS  
BRIEFLY TOLD

It has been disclosed that a large body of U.S. troops recently went direct to New Zealand from the U.S.

A large new double star has been discovered by Dr. J. A. Pearce, director of the Dominion astrophysical observatory at Victoria.

Informed commercial quarters reported that German shipments of war materials to Turkey had virtually ceased with the intensification of Allied air assaults upon Europe.

Radio Tokyo says Japanese engineers were trying to raise the British battle cruiser Repulse, which was sunk by Japanese planes in the China sea on Dec. 10, 1941.

Hungary has refused a request from Hitler that bomb-battered German industry be moved to that country, a Daily Telegraph Stockholm dispatch indicated.

The Jarvis, Ont. Record published a front page box story telling its subscribers there would be no paper for two weeks while the staff was serving with the 25th field regiment at Camp Niagara.

Manitoba's Premier Stuart S. Garson told the convention of the Chinese Nationalist League of Canada that he believed the brotherhood of democracy after the war would include Britain, U.S., Russia and China.

Six Turkish pilots are doing special training on Lockheed Lodestars at the British Airways Training School at Vauxhall, Transvaal. Six other Turks recently qualified in the Union on a specialized radio course.

The Nazi-controlled Paris radio said 3,000 volunteers would make up a "first regiment" of France for garrison duty, probably in central France, under plans announced by Pierre Laval.

## "Double Feature"

By ANNE ADAMS

Two captivating styles from one simple pattern is a value no smart mother can resist! First use Pattern 4373 by Anne Adams for a jumper and blouse outfit. Then make the saucy ruffled pinafore version. Both the styles button down the back!

Pattern 4373 is available only in children's sizes 2, 4, 6, 8, 10. Size 6, jumper, requires 1 1/2 yards 35-inch; blouse, 3/4 yard 35-inch; pinafore, 1 1/4 yards 35-inch.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

"Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

## MAKING SURVEY

A party of botanical experts, operating under the combined auspices of the joint economic committee for Canada and the United States and Harvard University, arrived recently in Edmonton en route north to make a botanical survey along the route of the Alaska highway.

Moscow subway passengers reach the platform from street level by means of photo-electrically controlled escalators.

Some parts of a modern torpedo are so small that they could be lost beneath a fingernail.

2530

## Fighter Control

One of the outstanding developments of aerial warfare, fighter control is now being taught in Canada. Above prospective operations clerks of the Royal Canadian Air Force Women's Division learn the secrets of fighter control behind locked doors at No. 1 School of Fighter Control at Rockcliffe air station, near Ottawa. At the desk, airwomen are making rapid calculations as to the speed and course of aircraft, using stop watches, mechanical calculators, protractors and parallel rulers. From left to right: Airwoman A. E. Bond, Detroit; Airwoman B. J. Scott, Toronto; and Airwoman A. Irving, London, Ont. In the background is Airwoman I. E. Armour, Winnipeg.

## Bread Of The Future

By Scientific Experts

Scientific studies by experts of the British Ministry of Food in comparative tests between Canadian, United States and British bread "have resulted in a discovery that may well prove one of the milestones in the history of flour and bread," states Dr. J. C. Drummond, Professor of Bio-chemistry at the University of London, England, and scientific advisor to the British Ministry of Food.

This discovery, as a result of the tests is that the Vitamin B bread now approved by the Canadian Government, rather than the reinforced loaf of the United States, or the whole wheat bread of Great Britain is the prototype of the bread of the future. In the tests, Canadian Vitamin B bread was classed best.

## FORTUNE FOR CHARITY

The late Edsel Ford left the great bulk of his estate to tax-free charity. Ford's will directs that most of his \$200,000,000 fortune be turned over to the Ford Foundation, a charitable organization. Thus the large part of the industrialist's legacy is immune from taxation.

## Up To Standard

Coinage Of Canada Has Been Assayed For Another Year

Every year about this time the privy council comes out with the news that Canada's coinage is being made according to the specifications of the law—the verdict of the "trial of the pyx."

The "pyx" is the box at the Royal Canadian mint—or any mint, for that matter—where every so often a sample coin is placed for future assay at the annual "trial."

This year the assay commissioners were Dr. L. C. Turnbull, R. W. Hoff and R. J. Trull, all of Ottawa. Judge E. J. Daly of Ottawa kept an eye on the proceedings, along with Dr. A. K. Eaton, taxation investigator representing the finance department.

First the coins were weighed and found to be well within the specified weight under the Currency Act. Then they were assayed.

Finance Minister Flavel summed the thing up for the committee of the privy council: "The findings referred to indicate that the coin, both as to weight and fineness, conforms with the standards established by the Currency Act."

And that, for another year, is that.

## THIS CURIOUS WORLD

By William Ferguson

ANSWER: It is a method of checking the results of operations on a decimal arithmetic.

## REG'LAR FELLERS—Safety Legion Member

## All Were Quite Young

So Far 23 British Peers Have Been Victims Of War

Twenty-two of Britain's titled noblemen, including two members of the royal family, have died in active service or as a result of enemy action so far during the war, official records showed. Most of the casualties were youths in their twenties.

Seventeen peers are listed as having been killed in battle or dying in active service. The other five were bombing victims or the casualties of other war-caused tragedies. In the World War, twenty-three noblemen perished. Dukes, earls, viscounts and barons have been killed in service since hostilities started in 1939. But according to Cyril F. J. Hankinson, editor of Debutts, a directory of the peerage, this war has not yet extinguished any titles, whereas the other war ended several because the title-holders who fell had no heirs eligible for the rank.

In addition to the dead several noblemen are prisoners of war. Among them is Lord Haig, only son of Field Marshal Earl Haig, commander of the British forces in France the first world war. The present earl was with a tank outfit in the Middle East when he was captured.

The royal family mourns the loss of the Duke of Kent, brother of King George VI, who was killed Aug. 25, 1942, in an air crash while on active duty, and Lord Frederick Cambridge, a nephew of George VI.

The first peers to die in this war were the Duke of Northumberland and the Earl of Coventry, both of whom fell in the line of duty in 1940. Northumberland, a member of one of England's most prominent families, held dukedom established in 1786. The Coventry earldom was founded in 1697.

## An Old English Firm

Has Made Many Historic Flags During Last 150 Years

Nearly 150 years ago five brothers named Edgington set up business in a little yellow brick house in the Old Kent road district of London, then a semi-rural area. The brothers, John, Alfred, Frederick, Thomas and Benjamin Edgington, were sail and cloth workers, carpenters and flag makers.

There, in the little house in the Old Kent road the brothers fashioned and sewed the 31 flags used in Nelson's famous signal at Trafalgar: "England Expects That Every Man This Day Will Do His Duty."

In 1942, in a somewhat enlarged factory, skilled hands fashioned a French tricolor. The work was supervised by John Edgington Hill, a descendant of the Edgington brothers. The firm was established in 1792 on the Arc de Triomphe, Paris, by Acting Pitt Lt. A. G. Gwatford during a daylight raid which earned him the D.F.C.

The Edgington firm always made the Pall Mall decorations for national celebrations. They made the state decorations for the coronations of King George V and King George VI. They made the flags for the wedding of the Duke and Duchess of Kent and the flags which drape the cenotaph.

## Not Being Funny

Lieutenant Had To Convince Captain He Was Not Joking

An army officer named Blunt found it necessary to get in touch with another officer, who he did not know personally. As it happened, this officer's name was Sharp. "Hello," said the first man into the telephone, "is that Captain Sharp speaking?" "It is," came the voice at the other end of the wire. "Well, this is Lieut. Blunt," continued that worthy. "Look here," Sharp cut in, "I don't want any funny stuff about names." "But I'm not being funny," protested Blunt. "That is really my name." Eventually the other officer was convinced, and Sharp and Blunt carried on their conversation.—Belfast News-Letter.

If you go visiting for a week-end or longer, it is the polite thing to take along your ration book.

## Knows His Parachute

Veteran 'Chutist Has Now Joined The Air Force

AC2 LORNE BENVILLE

If at some future date, AC2 Lorne Benville, Portage la Proulx, after a stiff battle with Messerschmitts in the role of air gunner, finds it advisable to "bail out," he'll probably consider the drop to earth a bit monotonous . . . for it will boost his "jump" total over the sixty mark.

Sitting by his tidy bunk at No. 2 Manning Depot, Brandon, Man., AC2 Benville surveyed his new job in dispassionate fashion. At Brandon he awaits the first step in the conversion of a veteran parachute test-jumper in civilian life to an air gunner in the Royal Canadian Air Force.

"I figure being an air gunner is about the best way to do my part in winning the war," observed the quiet, soft-spoken airman. "To me it seems no more dangerous than parachute test-jumping." He speaks with authority on jumping having started his career as a parachutist four years ago at the age of 16. From heights as low as 2,000 feet and as high as 15,000 feet he made 60 jumps. In addition to test jumping he did stunt work at fairs and exhibitions.

According to Benville, parachute jumping is only as dangerous as one makes it. "There is actually no sensation of falling during the drop through space," he will tell you. "You just step straight out of the ship for a walk in the fresh air—straight down at 125 miles an hour."

Reluctantly, the erstwhile test-jumper told of a couple of his "near misses." Once his harness worked loose during the drop and the reserve parachute caught in front of the ripcord; he dropped 6,500 feet before he got the chute to blossom out. Another time, he tripped as he threw himself out of the aircraft, plunged straight down thousands of feet while he fumbled for his rip cord ring. "Finally I found it, or I wouldn't be here to tell the story," he told with a smile.

Benville's wife lives at Portage la Prairie. His parents, Mr. and Mrs. J. R. Benville live in Toronto, Ont. He is a member of the Canadian Parachute Club.

## Greatly Appreciated

Senator Raeburn Made No Speech When He Introduced Winston Churchill

When Speaker Sam Raeburn introduced Prime Minister Churchill to the U.S. Congress, he did a great job, states the St. Mary's Journal-Argus. He used only 30 words which included the phrase, "one of the most outstanding figures of all the world." And maybe the crowded house which came to hear Churchill, didn't appreciate the pointed brevity. Unlike many introducers who start out with the statement: "Our speaker really needs no introduction" and then launch out on a lengthy tirade, Speaker Raeburn said all that was necessary in a moment and then he sat down. His good judgment made a wonderful impression. It was an example which we trust will have its effect wherever speakers are introduced throughout the world from now on. Speaker Raeburn made history.

## Needed For Subs

Best Men In German Merchant Service Replaced By Women

According to word reaching London German women now are being employed among crews of ships that have to run the gauntlet of British mines and bombing along the North Sea coast from Kiel to the mouth of the Rhine. All the best men from the German merchant service, as from the navy, have reportedly been drafted to help man the U-boat fleet.

## MAKING MUNITIONS

Instead of idling about while on the "pool" waiting for ships, merchant seamen and ships' officers now are working in munition plants at Liverpool making guns and shells which they may later use against enemy submarines or divebombers.

FRIDAY, JUNE 25th, 1943

## Local News

Joe Richards of Calgary, is a visitor at the Geo. R. Jones home.

Lorne Wilson of Carstairs, shipped several of fat cattle on Monday.

Marion Huston spent the week-end in Calgary, the guest of Claire McElderal, Bowness Road.

Hank McDonald and Dave Weinmar made a business trip to Newton on Wednesday afternoon.

Jack Ferguson of the R.C.A.F., was a visitor at the home of Mr. and Mrs. Harve McCool this week.

Jack Harrison shipped a car load of hogs on Monday night's train. Alex Watson, horse buyer, shipped a car load of hogs on the same train.

Mr. and Mrs. Frank Ruddy attended the graduation in Calgary last week, when their daughter Hazel, was one of the graduates.

The weather man pulled the levers again on Tuesday. Just enough to make it miserable for the boys in the fields.

Tummy Morrison of race horse fame, was a visitor in our town on Monday evening. He had two winners and a third in the last day of racing at Winnipeg.

Forty baby pheasant chicks arrived in Crossfield from Brooks on Wednesday morning. It is to be hoped we get a good percentage of these birds raised.

The friends of Miss Harold Robinson will be glad to know she is able (at times) to sit up and take nourishment. It is to be hoped she improves and gets back on her feet again.

The Air Cadets have received their summer issue of uniforms. Unless it warms up soon, they won't have much use for them.

Mrs. Don Cameron and daughter Margaret, were in from the farm Wednesday and attended the shower given in honor of Miss Vera Atkins.

Don Cameron is playing means to ten nice little pheasants. The little birds are doing fine. We hope Don does not kill them with affection.

Those seen getting off the six o'clock train on Thursday evening were: Leont, and Mrs. Tweedie, a veteran of the Imperial Forces; Mr. Sid Jones and a Liquid Air employer, Allan Duncan.

Mr. and Mrs. Jeff Venables of Cavendish, Alta., were calling on their Crossfield friends Monday. Jerry reports the east country is badly in need of rain.

Seen in Calgary last Saturday were Mr. and Mrs. Wickerson, Jane and Roy Wolkstein, D. J. Hanson, Mr. James Huston and Marion, Mr. Wyle and Clarence Riddell.

In a letter received from Sgt. Pilg Warren Hall to his parents, it is a pretty safe bet. Warren of Shorby, as he was most commonly called, is in India. So you see how some of our boys get around.

A miscellaneous shower was held at the home of Mrs. Merle Jones in honor of Miss Vera Atkins, bride-elect. Many lovely gifts were received. Miss Viola Kinney, Miss Marion Huston and Mrs. Frank Murdoch poured tea.

Miss Mabel Waterhouse and Miss Irene Walker are leaving for Toronto Friday evening. Irene expects to visit her brother Cecil, of the R.C.A.F., who is stationed in the East, before returning home.

Dominion Day will be celebrated on July 1st this year, instead of the first Monday of July as previously determined, under an order-in-council passed by cabinet council.

## Dean H. R. Ragg Elected Bishop of Calgary Diocese

The meeting for the election of a Bishop to take the place of Archbishop Sherman now at Winnipeg, took place in the ProCathedral, Calgary, on Tuesday of last week.

The following represented this mission: Messrs. J. H. Johnston, Harman; A. T. Kemp, Oida; Thos. Treadaway, Crossfield; William Glen Ferry, Balzac; and the Rev. A. D. Currie, Rural Dean of Red Deer.

There was a very large representation of both clergy and laity. When the roll was called, 34 clergy answered to their names and 118 laymen.

When the list of nominations was read out the following appeared on the list: The Very Rev. H. R. Ragg, Dean Swenson of Vancouver, Waterman of Niagara, Canon Fulton of Saskatoon; Rev. D. F. Kemp, Calgary; Canon Wilkinson of Montreal; Bishop Boverie of Athabasca; Rev. Partington of Gravelton; Rev. Hardin of Kootenay; the Rev. Hardin of Calgary; the Rev. Axon of Macleod; Canon Middleton of Cardston; and the Rev. A. D. Currie of Oida. The latter three withdrew their names from the list of nominees. It required 18 clergy to elect and 50 laymen. On the first ballot being taken, the result showed that 20 clergy voted for Dean Ragg and 50 laymen. On a second ballot being taken the result was 28 clergy and 80 laymen for Dean Ragg. The secretary of the Synod, the Rev. Canon Montgomery then declared Dean Ragg duly elected as Bishop of the Diocese. A short time after Archbishop Sherman duly confirmed the election.

## Towns Asked to Stamp Out U-Boat Campaign

The chairman of War Savings Stamp sales in your Unit has received from the Provincial Stamp Committee, all the material in connection with the "Stamp Out the U-Boat" Campaign, which commences on June 28th and concludes on July 31st.

It is our opinion that this will prove to be one of the most interesting Stamp promotions which has ever been inaugurated in this province, and I am sure that we can put it over in a big way if everybody puts their shoulder to the wheel.

In order that local interest may be created in this campaign, it has been decided that the various Units in certain districts will be buying deputy charges for the Canadian Corvette which is named after towns in their immediate vicinity. For your information there are eleven Corvettes named after points in the Province of Alberta. They are as follows:

Medicine Hat, Lethbridge, Drumheller, Calgary, Red Deer, Wetaskiwin, Vegreville, Camrose, Athabasca, Blairmore and Claiborne.

Every dollar's worth of stamps sold will be utilized for the purchase of deputy charges to be sent to the particular Corvette in your district. Before the drive commences, the mayor of the town after which the Corvette is named, will receive a wire from the Captain of the ship, wishing the district success in this drive.

Here's hoping that the campaign in your Unit proves to be an outstanding success, as we are sure it will be if we all do our part.

H. R. Hill, Secretary, Public Relations Section.

A big family re-union was held at Mr. and Mrs. James Sharpe last Saturday evening, when P/O Lorne Sharp returned home. All his kin folk were on hand as well as his (gal). Lorne, although thin in the face after a tonsil operation, is quite well and had some wonderful experiences. He says that no better boys ever crossed the Atlantic than those from Crossfield.

Married in Carbon on June 10th, Mr. Herbert Hehr to Miss Dorothy Luft, daughter of Mr. and Mrs. Henry Luft. Those attending the wedding from here were: Mr. and Mrs. Fred Elward, John and Dolly, Mr. and Mrs. John Hehr and Mr. and Mrs. Maxwell Hehr.

Ernie Sharp ran into some bad roads last Thursday on his way home from the mines and was forced to leave his load at Frank Lait's until the roads dried up. However Ernie has his truck home and is waiting for another rain before going for more coal. He was forced to leave his coal at Bill's the second trip.

## NATIONAL SELECTIVE SERVICE

## Important Notice

## TO CERTAIN EMPLOYERS AND EMPLOYEES

TO MAKE available for essential employment the services of men in classes already designated as callable for Military Training under National Selective Service Mobilization Regulations, two Orders were issued during May.

It is now illegal for any employer to continue to employ or to engage any man affected by these Orders, except under special permit from National Selective Service. Employees affected must report to the nearest Employment and Selective Service Office, and be available for transfer to more important work.

If you as an employer or as an employee, have not complied with these Orders, do so immediately. Get in touch with the nearest Employment and Selective Service Office either personally or by writing. Further delay will involve penalties. Compliance with the law in wartime is the minimum duty of every citizen.

The age and marital classes of men covered by these Orders are as follows:

- (a) Every man born in any year from 1917 to 1924 (inclusive) who has reached age 19.
- (b) Every man born from 1925 to 1916 (inclusive) who, at July 15th, 1940, was: (i) unmarried; or (ii) divorced or judicially separated; or (iii) a widower without child or children.
- (c) Every man born from 1925 to 1916 (inclusive) who has, since July 15, 1940, become a widower without child or children now living.
- (d) Every man born from 1925 to 1916 (inclusive) who, since July 15, 1940, has been divorced or judicially separated.

Men as described above are covered if in any of these employments:

- (1) Any occupation in or associated with retail stores;
- (2) Taverns or other establishments selling liquor, wine or beer;
- (3) Barber shops and beauty parlours;
- (4) Wholesale florists;
- (5) Gasoline-filling and service stations;
- (6) Retail sale of motor vehicles and accessories;
- (7) Any occupation in or directly associated with entertainment including but not restricted to theatres, film agencies, motion picture companies, clubs, bowling alleys, pool rooms;
- (8) Any occupation in or directly associated with dyeing, cleaning and pressing (not including laundry work); baths; guide service; shoe shining;
- (9) Any occupation in or directly associated with the manufacturing of feathers, plumes and artificial flowers; chewing gum; wine; lace goods; greeting cards; jewelry;
- (10) Any occupation in or directly associated with distilling alcohol for beverage;
- (11) Any occupation in or directly associated with the factory production of statuary and art goods;
- (12) Any occupation in the operation of ice cream parlours and soda fountains;
- (13) Any of the following occupations: bus boys; charmen and cleaners; custom furriers; dancing teachers; dish washers; domestic servants; doormen and starters; elevator operators; greens keepers; grounds keepers; hotel bell boys; porters (other than in railway train service); private chauffeurs; taxi drivers; waiters.

If in doubt as to the application of these orders, consult the nearest Employment and Selective Service Office. But once again, if you have not already complied, do so without further delay.
